EXPERIENCE

Ciklum — Senior SRE Engineer

Mar 2020 - Present

- As part of the SRE team responsible for critical business systems across AWS accounts and organizations
- Creating/improving new technical solutions to increase efficiency for existing microservices and decrease time/cost efforts for a new one
- Investigating and creating reports of weaknesses and vulnerabilities for teams
- Building a monitoring/alarm system to provide quick response on unpredictable events

Jan 2020 - Mar 2020 — Senior DevOps Engineer

- Cover CI/CD workflow under Kyiv site for multiple AWS accounts, across a bunch of microservices
- Migrated existing infrastructure into IaS, terraform as main tool.

Sep 2019 - Jan 2020 — Middle DevOps Engineer

- AWS administration and configuration
- Building a fault tolerance and high availability CI/CD process for new microservices
- Configuring ECS workflow, memory, performance optimization
- Detecting and monitoring security issues, improving infrastructure security and resistance.

Intellias — Middle DevOps Engineer

Apr 2019 - Sep 2019

- AWS IAM management optimization
- Supporting Atlassian Stack on AWS environment (Jira & Confluence on Rundeck, Bitbucket on top of Kubernetes)
- Integrated terraform pull request automation with Atlantis
- Configuring terraform configuration drift detection.
- Monitoring configuration (Synthetic tests on NewRelic, scheduling & escalation policy on PagerDuty)
- CI/CD process of building AMI golden image on AWS

Certifications & Courses

AWS Certified SysOps
Administrator Associate

Azure Fundamentals Certified
Engineer

Google Cloud Certified
Associate Cloud Engineer

Cisco CCNA Routing and
Switching

SKILLS

DevOps toolset: AWS,
Terraform, Jenkins, Docker,
Kubernetes, Ansible, Vault

Cloud: AWS, vCloud, GCP,
Azure

Languages: Python, C++,
Groovy, Powershell, Batch,
Bash

Monitoring & Alerting:
Prometheus, Kibana,
NewRelic, PagerDuty,
OpsGenie

Databases: ElasticSearch,
MySQL, MariaDB

VCS: Git, TFS

Luxoft — *Junior Configuration Engineer*

Apr 2018 - Apr 2019

- Configured CI for high load systems, support full cycle build, and test process
- Involved in migration from freestyle jobs to pipelines on Jenkins
- Engaged in the migration of ElasticSearch to a new version, deploying on K8s cluster.
- Migrated Nexus repositories.
- Optimization of internal team processes for increased velocity and security

LANGUAGES

English (B1)

Epam Systems — *Trainee DevOps Engineer*

Feb 2018 - Apr 2018

- Increase skills in DevOps technologies, linux administration and automation
- Configuring chroot – apache, httpd – apache tomcat (frontend/backend interaction using docker containers and docker compose), bash scripts, python (network tools, unit testing)

InfoSails Group — *System Administrator*

Aug 2016 - Jan 2018

- Checking and monitoring server machines (VMWare)
- Setup and maintenance servers, endpoint devices and computers
- Maintenance Netstar ATE, distributed sites, configuring mail server Configuring separate network for other departments (TP-Link, Cisco)

Upwork — *Freelancer*

Aug 2016 - Nov 2017

- Created sites on WordPress using Divi
- Worked with American client and wrote a blog, varied articles around different topics

National Aviation University — *Assistant & Support Engineer*

Mar 2016 - Jun 2016, Dec 2016 - Jun 2017

- Support of networks and end devices.
- Accompanied the Institute's website, developed new site on Joomla

International Science and Educational Center of Information Technology and Systems — *Technician*

Jul 2013 - Jun 2014

- Support computer stations.

- Setup antivirus software, provided and configured open video conference on Linux desktops

EDUCATION

National Aviation University — Master Degree

Aug 2017 - Feb 2019

Information and Communication Systems Security

National Aviation University — Bachelor's Degree

Aug 2014 - Jun 2017

Information and Communication Systems Security

Kyiv College of Electronic Devices — Specialist

Sep 2010 - Jul 2014

Application programming and Software Engineering
